

Non-Sparking Sledge Hammer with Double Face

This sledge hammer is designed for use in environments where flammable or explosive materials are present. It is made from non-sparking materials such as brass, bronze, and copper alloys.

Product Overview

Non-Sparking Sledge Hammer

Designed for safety in hazardous environments, this double-face sledge hammer is engineered to prevent sparking when struck against hard surfaces. It is an essential tool for industries dealing with flammable or explosive vapors, liquids, and dusts, such as oil and gas, mining, and chemical processing. Constructed from high-quality non-ferrous alloys, it offers a reliable solution for heavy-duty striking tasks where safety is the primary concern.

Material & Construction

Available Handle Types

- Fiberglass Handle
- Wooden Handle
- Plastic Handle

Material Composition

Aluminum Bronze, Beryllium Bronze, Copper Alloy, Brass

Technical Data

Sledge Hammer Technical Data

Size/Weight	Length (mm)	Al-Cu Weight (g)	Be-Cu Weight (g)
1.35 (3P)	350	1350	1660
1.80 (4P)	355	1800	2060
2.30 (5P)	400	2300	2600
2.70 (6P)	400	2700	3000
3.60 (8P)	900	3600	4920
4.50 (10P)	900	4500	5820
