

Non-Sparking Striking Box Wrench

This striking wrench is die-forged and corrosion resistant for durability. It is available in sizes ranging from 17mm to 180mm.

Product Overview

Engineered for Hazardous Environments

The Non-Sparking Striking Box Wrench is specifically engineered for use in environments where flammable or combustible vapors, liquids, dust, or residues are present. Designed to mitigate risks associated with mechanical, friction, and impact sparks, this tool ensures operational safety in volatile conditions. Its durable, die-forged construction offers both corrosion resistance and reliable performance for demanding industrial applications.

Technical Specifications

Standards Compliance

OSHA • NFPA • MSHA • DIN 7444

Available Sizes

17mm to 180mm

Design Features

Die Forged, Non-Sparking, Corrosion Resistant, 12-Point Box End

Head Angle

15 degrees
