

Non-Stick Grill Pan with Ridged Surface

This non-stick grill pan features a ridged surface. The design allows for creating grill marks on food while enabling fat to drain away during cooking.

Product Overview

Professional Ridged Grill Pan

This premium non-stick grill pan features a specialized ridged surface designed to create professional grill marks while allowing excess fat to drain away from your food. Its durable construction ensures even heat distribution, making it an ideal choice for high-quality searing and healthy cooking. The rectangular design and integrated side handles offer excellent maneuverability and efficient use of cooking space.
