

Non-Stick Soleplate Steam Iron

This steam iron is designed for efficient garment care. It features variable steam settings, a burst of steam function, and a non-stick soleplate.

Product Overview

Professional Garment Care

The EI9508 steam iron is engineered for high-performance garment maintenance, featuring a smooth non-stick soleplate that ensures even heat distribution across all fabric types. It provides versatile ironing options, including adjustable steam settings, a burst of steam for deep wrinkles, and vertical steaming for hanging clothes. With built-in safety features such as automatic shut-off and overheating protection, this iron is designed for reliability and ease of use in professional environments.
