

# Nonferrous Metal Sample

This is a nonferrous metal sample. It is suitable for various industrial applications.

166x130 10kg inn

## Product Overview

### Nonferrous Metal Sample

This nonferrous metal sample represents a high-quality material suitable for industrial analysis and processing. Featuring a dark, textured metallic composition, this specimen is ideal for material testing, metallurgical research, or as a reference sample. Its distinct physical characteristics make it a versatile choice for various manufacturing and laboratory applications.

## Technical Specifications

### Sample Dimensions

**166 mm**

Width

**130 mm**

Height

### Material Classification

Nonferrous, Industrial Grade, Base Metal

### Sample Weight

10 kg
