

Notched Trowel with Wooden Handle

This notched trowel features a flat metal blade with evenly spaced, square-shaped notches along one or more edges. The tool is equipped with a cylindrical wooden handle attached to the blade via a metal bracket.

Product Overview

Professional Notched Trowel

This high-quality notched trowel is specifically engineered for professional masonry and tiling applications. Featuring a durable metal blade with precision-cut square notches, it ensures the perfect application of adhesive and mortar for optimal bonding. The classic wooden handle provides a comfortable, ergonomic grip for extended use on the job site.
