

# Note Liquid Injection Gun for Mining

This note liquid injection gun is designed for use in coal mine compound mining operations. It is suitable for metallurgy and mining engineering applications, specifically in nonmetal mining.

## Product Overview

### Professional Mining Injection Solution

The DZ-25 series note liquid injection gun is a specialized tool engineered for demanding coal mine and compound mining environments. Designed for efficiency and reliability in heavy-duty applications, this equipment supports critical metallurgy and nonmetal mining engineering tasks. Its robust build quality ensures consistent performance in underground operations.

## Technical Details

### Usage Environment

Underground Mining • Professional Grade

### Model Identifier

DZ-25

## Application Scope

### Industries

Coal Mining, Metallurgy, Nonmetal Mining Engineering, Compound Mining
