

Notebook Computer Speakers

These notebook speakers provide enhanced audio output for laptop computers. Their compact, two-tiered design integrates drivers for quality sound in personal listening spaces.

Product Overview

Innovative Notebook Audio Solution

The ER1026V represents a breakthrough in notebook speaker design, balancing a fashionable aesthetic with significant improvements in audio performance. The engineering team focused specifically on bass extension to overcome the common limitations found in compact notebook audio devices. Its unique versatile design allows the unit to function as a unified base or as split stereo speakers.

Design & Features

Design Versatility

- Split and merge functionality
- UFO-inspired integrated mode
- Beetle-styled split configuration
- Non-skid base for stability

Design Patent

ZL200930081923.4
