

Nozzle Holder for SMT Placement Machines

These nozzle holders are designed for use in SMT placement machines. They provide a secure and reliable attachment for nozzles of various sizes.

Product Overview

Precision Nozzle Solutions for SMT Assembly

These high-quality nozzle holders are engineered for seamless integration with precision placement machines. They feature robust construction and precise threading to ensure secure and reliable nozzle attachment during high-speed operation. Available in both original new and copy new variants, these components are designed to meet stringent quality requirements for optimal performance.

Technical Specifications

Supported Nozzle Models

- CN030 (0.5/0.25)
- CN040 (0.75/0.38)
- CN065 (1.2/0.65)
- CN140 (2.2/1.4)
- CN220 (3.6/2.2)
- CN400N (6.2/4.0)
- CN750 (9.0/7.5)
- CN1100 (12.7/11.0)

Associated Components

Component Category	Description
Pneumatics	Air Cylinder WDDA40x30, Multi Cylinder GMC-13-29-VG1
Electrical	VME CPU Board MVME 162PA-252SE, Circuit Breaker DEG-32B
Hardware	Tray Cover Bracket, Tee Fitting KQ2T08-06, Double Union UWD06-04

Quality Grade	Original New, Copy New
---------------	------------------------

Compatibility

Supported Equipment	CP40, CP45, CP45NEO, CP50, CP50II, CP55, CP60
---------------------	---
