

Nuclear Facility Personnel Access Gate

This specialized personnel gate is designed for controlled access in nuclear facilities. It features robust construction and advanced locking mechanisms for enhanced security.

Product Overview

High-Security Access Control

This specialized personnel gate is engineered specifically for the demanding environments of nuclear power plants. It provides robust, controlled access to sensitive areas, utilizing advanced locking mechanisms to ensure maximum security. Designed for durability, the gate is capable of withstanding harsh environmental conditions and radiation exposure while maintaining operational efficiency.

Security & Features

Security Features

Biometric Scanning, Card Reader Integration, Advanced Locking Mechanisms, Controlled Access

Design & Construction

Environmental Resistance

Radiation Resistant • Harsh Environment Rated • Heavy-Duty Construction

Primary Application

Nuclear Power Plant Facilities
