

# Nut Grinding Machine for Sesame, Peanuts, and Almonds

This grinding machine is engineered for processing nuts such as sesame, peanuts, and almonds. Constructed from stainless steel, it ensures hygiene and durability while delivering consistent results.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Oil-Seed Grinding

This specialized grinding machine is engineered for processing high-oil materials including sesame seeds, peanuts, and almonds. Featuring a robust stainless steel construction, it provides a hygienic and durable solution for industrial food processing. The precision roller mechanism allows operators to adjust the particle size, ensuring consistent production quality for diverse food applications.

## Technical Specifications

Supported Materials	Sesame, Peanuts, Almonds
Working Principle	Roller-based squeezing and milling
Particle Size Control	Yes

## Performance Features

### Key Operational Benefits

- Low operating noise
- High production capacity
- Easy to operate
- Adjustable roller distance for precise grinding

### Construction Material

Stainless Steel
