

# Nut Processing Line

This nut processing line includes machines for shelling, roasting, peeling, strip cutting, chopping, and butter making. It efficiently processes nuts into various forms.

## ADDITIONAL IMAGES

## Overview

### Comprehensive Nut Processing Solution

This integrated nut processing line provides a complete end-to-end solution for commercial food production. The system encompasses multiple stages of operation, including shelling, roasting, peeling, strip cutting, chopping, and butter production. Designed for efficiency and consistency, this machinery is suitable for high-volume processing of various nut types.

## Capabilities

### Available Functions

- Nut Shelling
- Roasting
- Peeling
- Strip Cutting
- Chopping
- Butter Making

### Supported Formats

Sliced, Slivered, Ground, Paste/Butter, Flour

## Operational Details

### Compatible Raw Materials

Almonds • Peanuts • General Nuts
