

Nylon Backed Flap Discs

Flap discs with nylon backing pads are abrasive tools for grinding, blending, and finishing on materials like metal, wood, and plastic. The nylon backing pad offers flexibility and support, allowing the disc to conform to contoured surfaces and reduce vibration during use.

Product Overview

High-Performance Nylon Backed Flap Discs

These nylon-backed flap discs are engineered for efficient grinding, blending, and finishing tasks across a variety of materials including metal, wood, and plastic. Featuring a quick-change backup pad design, they are built to minimize downtime and simplify disc changes during operation. The overlapping abrasive flaps ensure a consistent, controlled material removal rate, while the nylon backing provides the necessary flexibility to conform to contoured surfaces and reduce vibration for a smoother finish.

Performance Features

Key Benefits

- Quick change backup pad system
- Fast initial cut rate
- Smooth cutting action
- Excellent surface finish
- Reduced vibration during operation

Application

Primary Applications

Grinding • Blending • Finishing

Suitable Materials

Metal, Wood, Plastic
