

Nylon Brake Tubing

This nylon tubing is specifically designed for automotive brake systems. It provides reliable control of the braking mechanism.

Product Overview

High-Performance Nylon Tubing

This nylon tubing is engineered for demanding industrial applications, offering exceptional durability and reliability. It features excellent resistance to abrasion, tearing, and impact, ensuring stable performance in complex systems. Designed for versatility, this tubing is suitable for pneumatic systems, fluid transfer, and instrumentation, providing consistent dimensions and tight seals.

Material & Construction

Market Grade

Middle-grade • High-grade

Material Types

PA6, PA66, PA12

Operational Limits

Minimum Working Temperature

-40 °C

Maximum Working Temperature

120 °C

Physical Properties

Key Strengths

- Stable performance
- Abrasion resistant
- Tearing resistant
- Impact resistant

Available Colors

Orange, Blue, Black, Transparent
