

Nylon Cable Ties with Marker Plate

Nylon cable ties feature integrated marker plates for labeling and identifying bundled items. These ties are suitable for securing cables, wires, and other items, offering a surface for writing or attaching labels.

Product Overview

Professional Identification Cable Ties

These Nylon 6.6 cable ties are engineered for both secure bundling and efficient identification. Featuring an integrated marker plate, they allow for clear labeling of wires and cables, essential for organized maintenance and electrical installations. Constructed from durable, acid-resistant material, these ties offer excellent insulation and long-term reliability in demanding industrial environments.

Technical Specifications

Flammability Rating

UL 94V-2

Application Temperature

-40 °C

Min Temperature

85 °C

Max Temperature

Installation Temperature

-20 °C

Min Temperature

85 °C

Max Temperature

Key Material Properties

- Acid & erosion resistant
- High insulation properties
- Aging resistant
- High tensile strength

Material

Nylon 6.6

Ordering Information

Available Colors

Natural, Black, UV Black, Custom Colors Available
