

Nylon Fiber Optic Cable Suspension Clamp

This nylon fiber optic accessory serves as a cable dielectric suspension ADSS clamp. It is designed for the secure and reliable suspension of fiber optic cables in transmission and distribution applications.

Product Overview

High-Performance Suspension Solution

This high-quality nylon ADSS suspension clamp is engineered for secure and reliable overhead fiber optic cable installations. Constructed from durable, weather-resistant nylon, it provides excellent protection against UV radiation and mechanical stress. The dielectric design ensures electrical isolation and prevents signal interference, while the gentle grip protects cable fibers during deployment.

Technical Specifications

Designed for secure and reliable overhead fiber optic cable installations, minimizing mechanical stress.

Key Features

- Dielectric design for electrical isolation
- UV and weather-resistant construction
- Tool-free installation
- Fiber-safe clamping mechanism

Material

Durable Nylon

Application

ADSS (All-Dielectric Self-Supporting) Cable Suspension

Compliance & Standards

Certifications

CE • ISO • UL
