

Nylon Flap Wheel for Polishing

Nylon flap wheels are designed for polishing products. These wheels feature a layered construction with nylon flaps, providing flexibility and conformability to various surface contours.

Product Overview

Professional Nylon Flap Wheels

These nylon flap wheels are engineered for high-performance deburring, surface preparation, and finishing tasks. Featuring a flexible, layered construction, they easily conform to complex surface contours, making them ideal for working with stainless steel, titanium, and high-nickel alloys. They provide consistent results across a wide range of materials, including metals, plastics, and composites.

Technical Specifications

Primary Applications

- Deburring
- Polishing
- Surface Preparation
- Finishing

Compatible Materials

Stainless Steel, Titanium, High-Nickel Alloy, Plastics, Composites

Safety & Compliance

Safety Requirements

- Wear dust protection
- Wear eye protection
- Wear ear protection
- Keep away from children

Origin

Country of Origin

China
