

O-Type Cut-Off Ball Valve

This is an O-type cut-off ball valve. It is designed for 1.6MPa pressure and comes in sizes from DN15 to DN150.

Product Overview

O-Type Cut-Off Ball Valve

The O-type cut-off ball valve is designed with an integrated valve body and a separate ball core and stem, ensuring reliable performance in industrial fluid control applications. Engineered for a nominal pressure of 1.6MPa, this valve provides precise flow regulation and shut-off capabilities. Its robust construction makes it an ideal choice for diverse piping systems requiring durability and consistent operation.

Technical Specifications

Nominal Pressure

1.6 MPa

Pressure Rating

Available Nominal Diameters (DN)

15, 20, 25, 32, 40, 50, 65, 80, 100, 125, 150

Dimensions Table

Dimensional Data (1.6MPa)

DN	A	D1	N-d	H1	H2	H
15	130	85	4-13	72	70	360
20	130	85	4-13	72	70	360
25	140	85	4-13	72	70	360
32	165	100	4-18	80	75	370
40	165	110	4-18	100	95	410
50	203	125	4-18	107	100	425
65	222	145	4-18	108	105	470
80	241	160	8-18	127	125	520
100	305	180	8-18	145	140	570
125	356	210	8-18	170	170	630
150	394	240	8-23	185	180	660
