

Off-Grid 40W 18V Solar Power System with LED Lighting

This 40W 18V solar system is designed for off-grid power solutions. It includes a solar panel, charge controller, battery, and LED lamps for illumination.

Overview

Off-Grid Solar Power Solution

This 40W 18V solar power system is a comprehensive off-grid energy solution designed for remote locations, camping, and emergency backup power. The kit includes a high-efficiency solar panel, a charge controller for battery regulation, an energy storage battery, and multiple LED lamps. It provides a reliable and sustainable source of electricity where grid power is unavailable.

Technical Specifications

Solar Panel Power	40 W
System Voltage	18 V

System Components

Included Components

- Solar Panel
- Charge Controller
- Energy Storage Battery
- LED Lighting Lamps

Applications

Ideal Use Cases	Off-Grid Power, Camping, Emergency Backup, Remote Locations
