

Off-Grid Crystalline Silicon Solar Panel

This off-grid solar panel converts sunlight into electricity. Its crystalline silicon cell construction is encased in a durable frame, ensuring efficient energy conversion and long-term reliability.

Product Overview

Reliable Off-Grid Power Solutions

These crystalline silicon solar panels are engineered for durability and efficient energy conversion in off-grid applications. With a proven history of production excellence, these modules are built to meet rigorous international standards for safety and performance. The modular design ensures scalability, making them suitable for a wide range of power generation needs, from small residential setups to larger independent systems.

Technical Specifications

Power Output Range

3 W

Minimum Power

220 W

Maximum Power

Cell Technologies

Monocrystalline, Polycrystalline

Certifications & Standards

Quality & Safety Certifications

ISO 9001 • ISO 14001 • BSCI • IEC 61215 • IEC 91730 • UL 1703

Manufacturing & Customization

Customization & OEM

- Custom specification development
- OEM production with client branding
