

Off-Grid Solar Home Lighting System

This off-grid solar home lighting system provides power for lighting and charging small devices. It features a solar panel, control box with battery, LED lamps, and USB adapters for easy setup.

Product Overview

Off-Grid Solar Home Lighting

The MRD308 is a reliable off-grid lighting solution designed for areas lacking access to grid electricity. It provides a complete energy ecosystem for home lighting and small electronic device charging. Engineered for easy installation, this system ensures sustainable power harvesting through its durable solar panel and integrated control box.

System Components

Included Components

- Solar Panel
- Control Box with Integrated Battery
- LED Lamps with Individual Switches
- USB Charging Adapters

Key Features

Highlights

Off-Grid Ready, Energy-Efficient LED, USB Charging Capability, Easy Installation
