

Off-Grid Solar LED Lantern System

This off-grid solar LED lantern system provides versatile lighting solutions. It includes a solar panel for charging, multiple LED lanterns with integrated batteries, and a multi-connector charging cable.

Overview

Reliable Off-Grid Lighting Solution

The MRD406 Solar LED Lantern System provides a dependable, eco-friendly lighting solution for areas without access to electricity. Designed for versatility, the system includes a dedicated solar panel and multiple LED lanterns that feature ambient dome-shaped diffusers. This set is perfect for emergency preparedness, remote locations, and off-grid living requirements.
