

# Off-Grid Solar Power System (1kW-20kW)

This off-grid solar power system is designed for both commercial and residential use. It provides a sustainable power solution for locations without grid access, with power outputs ranging from 1kW to 20kW.

## ADDITIONAL IMAGES

## System Overview

A complete off-grid solar system configuration designed for energy independence.

Versatile power solutions for both home and business energy needs.

### Complete Off-Grid Solar Solution

This comprehensive off-grid solar power system is designed for both residential and commercial applications, offering reliable energy independence. With scalable power capacities ranging from 1kW to 20kW, the system provides a sustainable alternative to grid-tied power. Each installation includes high-efficiency solar panels, a robust inverter for DC-to-AC conversion, and integrated battery storage for 24/7 power availability.

#### Power Capacity Range

1kW, 3kW, 5kW, 8kW, 10kW, 15kW, 20kW

## Technical Specifications

#### Warranty (Inverter & Battery)

3 Years

#### Warranty (Solar Panels & Accessories)

25 Years

#### Annual Production Capacity

18000 sets/year

## Certifications

#### Quality Standards

TUV • CE • ISO • CQC • SGS

## Service & Support

After-sales Support	24 hours, with local service engineers in select regions
Global Presence	Exporting to over 25 countries
