

Off-Road Mountain Bicycle

This mountain bike is designed with a durable frame and front suspension fork for off-road use. It has multiple gears and disc brakes, providing reliable performance on various terrains.

Overview

Built for Versatility and Performance

This off-road mountain bicycle is engineered for riders seeking a robust and reliable experience across diverse terrains. Featuring a lightweight carbon fiber frame and a responsive steel suspension fork with lockout, it balances durability with agility. Equipped with a 30-speed drivetrain and hydraulic disc brakes, this bike ensures precise control and efficient power transfer for both recreational trails and adventurous cycling.

Frame & Suspension

Frame Material	Carbon Fiber
Fork Type	Steel Suspension Fork with Lockout
Fork Crown Material	Aluminum Alloy

Drivetrain & Components

Total Speeds	30 speed
Drivetrain System	LTWOO
Chainwheel & Crank	Prowheel Chainwheel, Alloy Crank
Chain	KMC
Pedals	Wellgo

Wheels & Braking

Wheel Size

26 inch Diameter	1.95 inch Width
----------------------------	---------------------------

Braking System

Hydraulic Disc Brakes

Tire Brand	CST
Rim Material	Aluminum Alloy
Hub Type	Aluminum Alloy Bearing Hubs

Cockpit

Cockpit Materials

- Aluminum Alloy Handlebar
- Aluminum Alloy Stem
- Aluminum Alloy Seat Post
