

Off-Road Vehicle Alloy Wheel

This premium alloy wheel is designed for off-road vehicles. It features a durable matte black finish and is engineered for enhanced strength.

Product Overview

High-Performance Off-Road Alloy Wheel

This premium alloy wheel is specifically engineered for off-road vehicles, combining a rugged aesthetic with maximum durability. Constructed from high-quality alloy, it offers superior resistance to corrosion and is designed to withstand the demanding conditions of off-road environments. The multi-spoke design features geometric cutouts and simulated beadlock accents for a professional, performance-oriented look.

Technical Dimensions

Wheel Diameter

17 inch

Min Diameter

20 inch

Max Diameter

Pitch Circle Diameter (PCD)

5*114.3, 6*114.3, 5*150, 6*150

Design & Finish

Design Elements

- Multi-spoke configuration
- Geometric cutouts
- Simulated beadlock accents
- Integrated center cap

Surface Finish

Matte Black

Performance & Material

Material

High-Quality Alloy • Corrosion Resistant

Recommended Application

Off-Road Vehicles
