

# Offshore Inflatable Survival Raft

These inflatable liferafts are designed for marine environments. They comply with SOLAS standards and can be used on international voyages.

## ADDITIONAL IMAGES

## Product Overview

### Offshore Survival Solution

These KHA-type throw-over inflatable liferafts are engineered for critical life-saving operations during maritime emergencies. Fully compliant with international safety standards, including SOLAS and various maritime classification approvals, they are suitable for vessels engaged in international voyages. Designed for rapid deployment and reliability, these rafts provide essential protection and buoyancy in offshore environments.

## Compliance & Certification
