

Offshore Platform Supply Vessel 83.4m

This offshore platform supply vessel is designed for transporting cargo and personnel. It features a large open deck, specialized tanks, and dynamic positioning.

Overview

Offshore Platform Supply Vessel (83.4m)

The 83.4m Platform Supply Vessel (PSV) is a versatile offshore support vessel engineered for the reliable transport of supplies, equipment, and personnel to offshore installations. Featuring a large open deck area and specialized cargo tanks, it is built to handle the rigorous demands of offshore logistics. Equipped with advanced dynamic positioning and safety navigation systems, this vessel ensures precise maneuvering and efficient operations even in challenging maritime environments.

Technical Specifications

Compliance & Safety

Safety Compliant • Environmental Standards

Length Overall	83.4 m
Operational Capabilities	Cargo Transport, Personnel Transport, Dynamic Positioning, Liquid Cargo Handling, Bulk Cargo Handling

Equipment

Navigation & Comm Systems

- Advanced Navigation Suite
- Advanced Communication Systems
- Dynamic Positioning System
