

# Offshore Supply Vessel, 61.2m, Twin 2750PS Engines

This 61.2-meter supply vessel is designed for offshore support operations. Powered by two 2750PS engines, it provides essential services including transportation of equipment, supplies, and personnel to offshore platforms and drilling rigs.

## ADDITIONAL IMAGES

## Overview

### Offshore Supply Vessel Capability

This 61.2-meter offshore supply vessel is engineered for robust support operations in challenging marine environments. Powered by twin 2750PS engines, it offers reliable performance for the transportation of equipment, essential supplies, and personnel to offshore platforms and drilling rigs. The design prioritizes operational efficiency with a spacious cargo deck and advanced navigation systems, ensuring safety and versatility for diverse offshore logistics needs.

## Technical Specifications

### Total Engine Power

**2750 PS**

Engine Power (Per Engine)

**2 units**

Engine Count

### Vessel Length

61.2 m

## Operational Features

### Vessel Amenities

- Spacious deck area for cargo
- Ample fuel tank capacity
- Ample water tank capacity
- Accommodation for large crew

### Key Operational Capabilities

Dynamic Positioning, Offshore Support, Cargo Transport, Personnel Transport
