

Oil Field Dual-Cab Chassis

This specialized chassis is designed for oil field operations. It features a robust construction with a dual-cab configuration for enhanced maneuverability and a large, flatbed platform for mounting equipment.

Product Overview

Robust Oil Field Chassis

The WS5391 is a specialized heavy-duty chassis engineered specifically for demanding oil field environments. It features a unique dual-cab configuration, providing enhanced maneuverability and operational flexibility for complex worksites. Built with all-terrain capabilities and a versatile flatbed platform, this vehicle is designed to carry substantial loads across rugged terrain with ease.
