

# Oil-Filled Radiator Heater

This oil-filled radiator heater is designed for efficient indoor space heating. It uses diathermic oil to provide consistent warmth, with adjustable heat settings and safety features including overheat protection and a tip-over switch.

## Overview

### Efficient Indoor Heating Solution

The Oil Radiator Heater NWA is a portable space heating apparatus designed specifically for indoor use. Utilizing diathermic oil as a heat reservoir, it provides consistent and efficient warmth for small to medium-sized rooms. Its design prioritizes both performance and user safety, featuring an optimized fin structure for heat dissipation and essential protection mechanisms.

## Technical Specifications

Heating Mechanism	Diathermic oil reservoir
Control Method	Rotary dial with multiple settings
Design Feature	Finned design for maximized surface area

## Safety & Features

Safety Mechanisms	Overheat protection, Tip-over switch
Mobility	Yes
Control Panel	Indicator lights for operating mode
