

Oil-Filled Radiator Heater with Fan

This oil-filled radiator heater delivers consistent heating for indoor environments. It includes adjustable heat settings and a built-in fan to ensure uniform heat distribution.

Overview

Efficient Indoor Heating Solution

The OHC-DFT oil-filled radiator heater is designed to provide consistent, reliable warmth for indoor environments like bedrooms, living rooms, and offices. It features an integrated fan for enhanced air circulation and a large heating surface for efficient heat radiation. With built-in safety mechanisms and mobility features, it offers a practical and comfortable solution for seasonal temperature control.

Performance & Control

Model	OHC-DFT
Heating Features	Thermostat Control, Energy Efficient, Large Heating Surface, Radiation Heating

Safety & Design

Safety Mechanisms

Thermal Cut-off • Pressure Tested

Mobility & Convenience

- Smooth castors for easy movement
- Convenient cord storage
- Easy to clean design
