

Oil-Filled Radiator Heater with Multiple Fins

This oil-filled radiator heater provides efficient space heating. It features multiple fins, six oil channels, tip-over protection, and overheat protection.

Overview

Efficient Space Heating Solution

The NST-J oil-filled radiator heater is designed to provide consistent, comfortable warmth for indoor environments. Featuring a robust steel construction with 0.5mm thickness, this unit offers adjustable heat settings and precise temperature control via an integrated thermostat. Equipped with mobility castors and a convenient cord storage system, it combines safety, efficiency, and ease of use for professional or residential applications.

Technical Specifications

Power Supply	220-240V, 50Hz
Steel Thickness	0.5 mm
Fin Dimensions	145mm x 580mm
Fin Configuration	5 to 15 fins
Oil Channels	6

Features & Safety

Safety Features

- Overheat safety cut-off
- Operating switches with indicator lights
- Adjustable thermostat

Usability

- Handle for portability
- Castor wheels
- Power cord wrapping part

Heat Settings	3
