Product Overview

Efficient Heating Performance

This oil-filled radiator is engineered for superior heat distribution, utilizing specialized slotted fins that heat up significantly faster than standard radiator designs. Designed for versatility and safety, the unit features adjustable power settings and integrated overheat protection. It is an ideal solution for supplemental space heating in residential or office environments, combining modern efficiency with reliable thermal performance.

Technical Specifications

Fin Dimensions	150 x 580 mm
Available Fin Counts	5 to 15 fins
Power Output Range	1000W to 2800W
Power Settings	3

Features & Safety

Performance Benefits

- Slotted fin design for faster heat-up times
- Adjustable thermostat control
- Smooth-rolling casters for portability
- Integrated handle for maneuverability

Safety Features	Overheat Protection, Power Indicator Light
Oil Type	Green environmental conducting oil
