

Oil-Free Air Compressor

This oil-free air compressor is designed for fast storage and high flow supply. It utilizes oil-free technology for clean and efficient operation.

Overview

High-Efficiency Oil-Free Air Compressor

This advanced oil-free air compressor is engineered for professional pneumatic applications, combining elegant industrial design with high-performance standards. It features a rapid air storage system and a high-flow supply capability, making it an ideal choice for tools like spray guns. Designed for reliability, it includes safety mechanisms like overload protection and operates with low noise and vibration for a comfortable working environment.

Technical Specifications

Technical overview of the 4-1500F35 model, highlighting flow rates and power specifications.

Input Power	1500 W
Tank Capacity	35 L
Motor Speed (50Hz)	1400 rpm
Motor Speed (60Hz)	1700 rpm

Performance

Air Flow Performance

120 L/min

Air Flow at 8bar

150 L/min

Air Flow at 4bar

Max Pressure

8 bar

Electrical

Voltage Compatibility

110-120V, 220-240V

Physical Characteristics

Gross Weight

32 kg

Package Dimensions

60 x 29.5 x 64 cm

Features

Design highlights including the forced air duct cooling system and precision engineering.

Key Features

Oil-Free • Low Noise • Low Vibration • Overload Protection • Forced Air Cooling

Certifications

CE
