

Oil-Free Air Compressor Motor for Oxygen Concentrators

This air compressor is designed for use in oxygen concentrators. It features a twin-cylinder design for efficient air compression and quiet operation.

Product Overview

High-Efficiency Oil-Free Compressor Motor

This oil-free air compressor motor is specifically engineered for critical applications such as oxygen concentrators and vacuum pumps. Featuring a robust twin-cylinder design, it delivers efficient air compression while maintaining quiet operation. Built with high-quality materials, this motor ensures durability and provides a reliable, consistent air supply for both medical and industrial environments.

Technical Specifications

Model Number	LW190-3L
Design Type	Twin-cylinder oil-free air compressor motor

Compliance & Quality

Certifications	CE • UL • VDE • 3C
Standards Compliance	ISO9001, ISO14001, ROHS, REACH

Applications

- Primary Applications**
- Oxygen Concentrators
 - Vacuum Pumps
 - Medical Equipment
 - Industrial Air Supply
