

Oil-Free Dual Cylinder Vacuum Pump

This oil-free vacuum pump features a dual-cylinder design for increased efficiency and reduced vibration. Constructed with high-quality materials, it ensures durability and is suitable for various industrial and laboratory applications.

Overview

Clean Performance for Demanding Environments

This oil-free dual cylinder vacuum pump is engineered to deliver reliable, contamination-free air performance for sensitive applications. Its dual-cylinder design minimizes vibration while maximizing efficiency, making it an ideal choice for medical, laboratory, and industrial settings where oil-free operation is critical. With integrated thermal management features like cooling fins and fans, this unit is built for continuous, long-lasting operation.

Technical Specifications

Lubrication

Oil-Free

Design Type

Dual Cylinder

Cooling System

Integrated Fan, Finned Heat Sinks

Applications

Suitable Industries

- Medical Treatment
- Laboratory Equipment
- Water Treatment
- Environmental Protection
- Printing
- Shipping
- Nitrogen Generation
- Food Processing
- Optical Instruments
