

Oil-Free Silent Air Compressor Pump

This oil-free air compressor pump operates silently, making it suitable for noise-sensitive environments. It delivers a maximum pressure of 1.5 bar with an air flow rate of 40L/min.

Product Overview

Clean and Reliable Air Compression

This oil-free silent air compressor pump is engineered for high-performance applications that demand clean, contamination-free air. Designed with a focus on noise reduction and durability, it offers consistent airflow and pressure output. It is an ideal solution for laboratory and industrial environments where reliable, quiet operation is essential.
