

Oil Press Controller Board with Display

This controller board is designed for use in oil presses. It includes a main power board and a display/button control board.

Product Overview

Control System for Oil Pressing Equipment

This specialized controller board is designed for precise operation of oil press machinery. It features a dual-component architecture comprising a main power board and a dedicated display and button control interface. This system provides the necessary electronic regulation and user input capabilities required for efficient oil extraction processes.

Technical Specifications

Model Number	YD-03A-DISPLAY
Serial Number	1001146661
Production Date Code	20140520

Components

Board Configuration

- Main power board
- Display/button control board

Interface Controls	K03 Button, K02 Button, K01 Button, L01 LED, L05 LED, L02 LED
