

Oil Press Machine

This oil press extracts oil from oil-bearing materials such as peanuts, soybeans, and sunflower seeds. It utilizes a motor-driven system and robust construction for continuous operation and efficient oil extraction.

Overview

Professional Oil Extraction Solution

The 6YL-80 oil press is a robust mechanical device engineered for efficient oil extraction from a variety of oil-bearing materials. Designed for continuous operation, it features a heavy-duty construction with a specialized pressing chamber and expeller screw system to maximize yield. This machine is an ideal solution for processing peanuts, soybeans, sesame, and sunflower seeds with ease of maintenance.

Technical Specifications

Model	6YL-80
Compatible Materials	Peanuts, Soybeans, Sesame Seeds, Sunflower Seeds

Key Components

Core Components

- Feeding Hopper
- Pressing Chamber
- Expeller Screw
- Discharge Cone
- Oil Collection System

Operational Features

Operation Type

Continuous Operation • Motor-Driven
