

Oil Press Machine

This oil press machine extracts oil from seeds or nuts. It features a vertical hopper for feeding raw material and a pressing mechanism driven by a motor and pulley system.

Product Overview

Industrial Oil Extraction Solution

This heavy-duty oil press machine is engineered for efficient oil extraction from a variety of seeds and nuts. Designed for agricultural and industrial environments, it features a robust vertical hopper feed system and a powerful motor-driven pressing mechanism. Its durable construction ensures reliable performance for high-volume processing requirements.

Technical Specifications

Primary Application

Agricultural Machinery • Oil Extraction

Key Design Features

- Vertical cylindrical hopper
- Motor-driven pulley system
- Bottom discharge oil outlet
- Industrial-grade chassis

Build Quality

Heavy-duty industrial grade

Mechanism Type

Motor and pulley driven expeller
