

# Oil-Sealed Submersible Pump for Irrigation

Oil-sealed submersible pumps are designed for farm irrigation. They are also suitable for water supply and discharge in various projects and mining operations.

## Product Overview

### Professional Irrigation Solution

The QY series oil-sealed submersible pump is engineered for high-performance drainage and irrigation in agricultural environments. Featuring a robust, oil-sealed motor design, this pump ensures superior cooling and continuous lubrication for demanding field operations. It provides reliable water transfer capabilities across a wide range of head and flow requirements.
