

Oilless Air Compressor with Twin Cylinder Pump

This oilless air compressor is designed for applications requiring compressed air. It features a compact design, red air tank, and twin cylinder pump for portability.

Overview

Compact Oil-Free Performance

This oilless air compressor features a twin-cylinder pump design, making it an ideal solution for applications requiring clean, oil-free compressed air. Its compact 9L tank and low-noise operation ensure it is suitable for light-duty tasks, including powering airbrushes, inflating tires, and operating small pneumatic tools. The unit is designed for portability and ease of use in professional environments.
