

Oilless Air Compressor

This energy-saving oil free air compressor is a new generation of electromechanical integration products. The host adopted high-speed motor and is totally enclosed.

Product Overview

Clean, Efficient Compressed Air Solution

This energy-saving, oil-free air compressor represents a new generation of electromechanical integration. Designed for high performance without the need for lubricating oil, it eliminates contamination risks, making it ideal for sensitive environments like medical, dental, and laboratory settings. Its compact, lightweight design combined with low-noise operation ensures reliability and ease of maintenance across diverse applications.

Performance & Features

Design Highlights

- High-speed motor
- Totally enclosed structure
- Twin-cylinder pump
- Adjustable pressure regulator
- Safety valve equipped
- Thermal overload protection

Key Features

Oil-free, Energy-saving, Low-noise, Compact, Dustproof, High-efficiency

Applications

Suitable Applications

- Spray painting
- Decoration
- Cleaning
- Fitness equipment
- Beauty industry
- Tyre inflation
- Medical & Dental
- Laboratory
