

Oilless Piston Air Compressor Pump

This oilless piston air compressor pump ensures reliable and efficient air compression. Its key features include a durable piston mechanism and compatibility with 220V power supplies, making it suitable for applications needing consistent air pressure.

Product Overview

Clean, Reliable Air Compression

This oilless piston air compressor pump is engineered to provide consistent and clean air pressure for professional applications. Its oil-free design significantly minimizes maintenance requirements while ensuring high-quality air output. Built with a durable piston mechanism, this unit is designed to handle demanding tasks while maintaining operational efficiency.

Technical Specifications

Current Range

8 A

Max Current

2.6 A

Min Current

Model	41600D
Power Supply	220V 50Hz
Capacitor Rating	30 μ F

Design & Features

Design Type

Oil-Free • Piston Mechanism

Color Components

- White
- Grate
- Black
