

Olive Harvesting Shaker with Adjustable Pole

The Olive Shaker Series ZLOM08 is a specialized machine-tool designed for efficient olive harvesting. The shaker head utilizes oscillating tines to gently detach olives from the tree, minimizing damage to the fruit and tree.

Product Overview

Professional Olive Harvesting Solution

The Olive Harvesting Shaker is a professional-grade tool engineered for high-efficiency fruit collection. Designed with a robust, adjustable telescopic pole, it allows operators to reach high branches with ease while maintaining control. Its oscillating tine system ensures a gentle detachment of olives, protecting both the fruit quality and the tree's health.

Technical Specifications

Harvesting Performance

120 kg/h
Max Capacity

280 mm
Rake Width

Electrical Requirements

Component	Voltage
Direct Voltage	12V
Power-unit Voltage	24V

Design and Reach

Cable Options

- 8m
- 10m
- 12m
- 15m

Telescopic Range	2.22 - 3.04m
Beating Rake Configuration	4+4 tines
