

Omnidirectional Barcode Scanner

This is a high-performance omnidirectional barcode scanner designed for fast and accurate scanning of 1D and 2D barcodes. It features a multi-laser scan pattern for superior barcode reading, even on damaged or poorly printed barcodes.

Product Overview

High-Performance Scanning Solution

The XL2020 is a high-performance omnidirectional barcode scanner engineered for rapid and precise 1D and 2D barcode identification. Utilizing a multi-laser scan pattern, it excels at reading complex, damaged, or poorly printed barcodes in demanding environments. This device is an ideal integration for retail, point-of-sale systems, and high-volume commercial scanning applications.

Technical Standards

Laser Safety Standards

- Laser Notice No.50 (July 2001)
- 825-1904-1:2002
- 1983-41-1907-42:2001

Certifications

21 CFR 1040.10, 21 CFR 1040.11

Features

Supported Barcodes

1D Barcodes • 2D Barcodes
