

Omnidirectional Digital Array Microphone for Conferencing

Digital array microphone with 360° omnidirectional audio pickup. Supports daisy-chaining and features noise cancellation for clear audio during video conferences.

Product Overview

Professional Conference Audio

This high-performance digital array microphone delivers 360-degree omnidirectional sound pickup for comprehensive coverage in any meeting space. It features advanced processing technologies including automatic echo cancellation, noise suppression, and gain control to ensure crystal-clear communication. Designed for reliability, the unit includes anti-loosening interface connections and supports flexible power options such as PoE.

Audio Performance

Pickup Pattern	360° Omnidirectional
Advanced Audio Processing	AEC, ANS, AGC
Cascading Support	3

Connectivity & Power

Connectivity Features

- Anti-loosening Ethernet interface
- Anti-loosening audio input
- Anti-loosening power connector
