

On-Demand Gas Water Heater

This gas water heater is designed for residential use. It features electronic ignition and precise temperature control for on-demand hot water.

Product Overview

High-Efficiency On-Demand Heating

This on-demand gas water heater provides a reliable and energy-efficient hot water solution for residential applications. Featuring an advanced water-cooling combustion system and low NOx emissions, it is designed to meet modern environmental standards while ensuring consistent performance. The unit includes a user-friendly touch LED interface, offering specialized modes such as ECO and Child Mode for enhanced safety and operational efficiency.

Technical Specifications

Dimensions (H x W x D)	660 x 370 x 213 mm
Exhaust System	AC motor fan exhaust
Combustion Technology	Water-cooling combustion

Features & Controls

Interface	Touch LED Screen
Operational Modes	ECO Mode, Child Mode, Heat load intensity display

Safety & Compliance

Certifications

CE Certified

Safety Systems

- Multi-protection device
- Low NOx emission control
