

On-Road Motorcycle with Single-Cylinder Engine

This is an on-road motorcycle equipped with a single-cylinder engine. It features a front fairing, a single exhaust pipe with a chrome heat shield, and a rear luggage rack.

Overview

On-Road Performance

This 250cc on-road motorcycle is engineered for reliable daily commuting and urban transport. Featuring a robust single-cylinder engine and a distinct aesthetic with yellow accents, it combines functional design with practical utility. The inclusion of a rear luggage rack and durable chrome heat shielding makes it a versatile choice for professional buyers seeking dependable transportation solutions.
