

One-Way Brass Check Valve with Filter

This check valve allows flow in only one direction, preventing backflow. It features a cylindrical body with a mesh filter element for preventing debris from entering the system.

Product Overview

One-Way Brass Check Valve with Filter

This high-quality brass check valve is engineered to ensure unidirectional flow, effectively preventing backflow in critical piping systems. Featuring an integrated mesh filter element, it provides essential protection by preventing debris and contaminants from entering downstream components. Its robust brass construction offers durability and reliability for various industrial and residential plumbing applications.

Technical Specifications

Application Suitability

- Industrial piping systems
- Plumbing installations
- Fluid control systems

Body Material	Brass
Filter Element	Integrated Mesh Filter
Operational Function	Unidirectional Flow, Backflow Prevention, Debris Filtration
